Keeping You Informed About the 2019 Bond

Scenic Middle School Parking Lot Remodel and New Building

An Update on Rogue Primary School

Crater High School Gym Gets Air Conditioning and Other Upgrades!

Hanby 1910 Building Remodel Nearing Completion

District-Wide Safety Improvements

Thank you voters for supporting our students and our schools and approving the 2019 school bond!

The Scenic Middle School parking lot remodel expands capacity and improves traffic flow.

Rogue Primary School will be ready for students this winter!

Crater High School's gym is getting a facelift with numerous seismic upgrades, updated facilities, and air conditioning!

Hanby 1910 Building Remodel is nearing completion to reopen January 2023

Scenic Middle School Receives Parking Lot Upgrade & New Building!

New Upgrades Improve Traffic Flow, Parking, Add Student Capacity

Thanks to the community's support of the 2019 bond, Scenic Middle School received significant parking lot upgrades and a new building this year!

In recent years, the need for enhancements to the parking lot and bus loop at Scenic Middle School has become more apparent. The old parking lot featured space for only 77 vehicles. And if you've ever driven by during arrival or dismissal, you've likely noticed school buses and parents competing for space.

The new design directs bus traffic to the back of the school while keeping parent traffic in the front. As part of the redesign, capacity has increased from 77 parking spaces to over 120 spaces and new lighting has been installed to enhance safety and visibility.

To support the upcoming school remodel and accommodate school growth, a new, permanent building has been added at Scenic Middle School. The new building will allow the school to relocate classrooms during mechanical, electrical, and plumbing upgrades and will be used for 6 additional classrooms once bond work is completed. The district is thankful for the opportunity to reduce overcrowding and increase flexibility among educational programs with this new addition!

2019 Bond Funds District Safety & Security Improvements

Now more than ever, school safety is a priority for D6 students, staff and community members. The community's support of the 2019 Bond has allowed the District to conduct several safety and security enhancements district-wide.

With bond funding, Jewett Elementary, Mae Richardson Elementary, Patrick Elementary, and Sam's Valley Elementary received upgraded intercoms, in addition to fire and security alarm systems. These systems will replace existing systems that have reached the end of their usable life. Installation is currently in progress at Crater High School, Scenic Middle School, Hanby Middle

School, and Central Point Elementary with completion scheduled by summer of 2023.

Many D6 schools have received upgraded perimeter security features thanks to the 2019 bond. Patrick Elementary, Sam's Valley Elementary, Jewett Elementary, Hanby Middle School, and Scenic Middle School have already received updated fencing and/or gates and Mae Richardson is scheduled to benefit from new fencing in the next year.

These upgrades, coupled with training and partnership with local law enforcement, are part of the District's relentless commitment to safe and secure schools for our community.

Rogue Primary School to Open in January 2023

We eagerly anticipate the opening of our newest building, Rogue Primary School in January 2023!

The District has been renovating the former 45,000 square foot Asante Healthcare building into the new Rogue Primary School over the course of the last two years.

The construction industry has experienced severe supply chain and labor shortages throughout the pandemic. As a result, many D6 projects including Rogue Primary School have been delayed. To mitigate the impact of these delays, RPS students and staff began the school year on the Central Point Elementary campus in temporary portable buildings. Once construction is completed this December, Rogue Primary will open its doors in January and the portables at Central Point Elementary will be removed.

This past October, Principal Maggie Staley, brought students and staff members to tour the site of their new home. As you can see, they are very excited to step foot into their new school!

Please stay tuned for updates about the grand opening of Rogue Primary School at rogueprimary.district6.org

Crater High School Remodel in Progress

Over the summer, the District began a significant remodel on the Crater High School gymnasium. Thanks to passage of the 2019 school bond, a 2.5-million-dollar state seismic grant, and funding from the student investment account, the CHS gym is receiving multiple upgrades over the coming months.

These upgrades will extend the building's life while providing a more safe and comfortable space for student athletes and our community. The major projects that will occur include the installation of heating and air conditioning, structural reinforcement for earthquake preparedness, locker room/restroom remodeling, and much needed improvements to mechanical, electrical and plumbing systems.

"We are thankful for the opportunity to make these much needed and appreciated upgrades to the Crater High School Gym," shared David Heard, CHS Athletic Director. "Our gym is a resource not only for student athletes, but many community programs and we look forward to continuing sharing our beloved gym with the entire Central Point community."

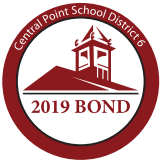

The CHS gym will be finalized and will reopen for student use in January 2023. The District is thankful for the community's support as we strive to provide safe and healthy facilities for generations of students to come.

Gym lobby will receive updates, including new trophy case!

Shear walls to bolster seismic protection are being installed in the main gym.

D6 Closing in on Hanby 1910 Building Remodel

The historic 1910 building at Hanby Middle School has been under renovation and construction for most of 2022. Due to fire safety and accessibility issues, the 3rd floor of the historic building was not utilized by the school. But thanks to careful planning and a combination of funding sources including the 2019 bond, a state funded seismic rehabilitation grant, and federal funded Elementary and Secondary School Emergency Relief (ESSER) the district is able to make substantial upgrades that will allow full utilization of the building.

This reinvestment into the historic 1910 building has cre-

ated additional classroom space and funded major seismic and mechanical, electrical and plumbing upgrades throughout the facility. Demolition and asbestos abatement began in late 2021 and the district is currently in the final stages of completion.

The District hopes to reopen the building for student use in January 2023 and will immediately utilize 7 classrooms, including 4 new classrooms located on the 3rd floor. We are thankful to the community for supporting this much needed renovation and preservation of our beloved 1910 building.

Demolition work on the historic building began in January 2022.

The Hanby Middle School 1910 Building remodel will allow full utilization of the 3rd floor and add five additional classrooms, including the updated Science classroom pictured here.

We invite you to stay informed about the progress of Hanby Middle School's 1910 Building by visiting our bond website at:
